

## Tyre & Fitment

IQ Retail's comprehensive and fully integrated solutions have built-in flexibility to offer single or multi-site as well as single or multi-terminal capability to meet the requirements of any fitment or tyre centre. IQ Retail combines robust accounting functionality with many other features such as integrated point-of-sale, inventory control, quotations, purchase orders, ledger and everything in between. It gives you traceability throughout the system with exceptional audit tracking and reporting, providing a complete business management system for the fitment and tyre industry.

We have a fully integrated system and if you combine our SingleView solution with our workshop module, you have a solution that is perfectly suited for the tyre and fitment industry.

### Workshop Module:

A fully integratable automotive that allows users to create client accounts, add an unlimited number of vehicles to their database and to book vehicles in for in or out work. Motor maintenance and parts can be tracked and maintained, while vehicle history records are kept, enabling the user to provide statistics as well as to report against saved motor vehicle history.

#### Benefits:

- Easily convert Job Cards to a Sales Order or Invoice
- Report against a vehicle recorded history
- Track the job status of each motor vehicle
- Multiple tracking and status methods

Designed to fulfill the specific requirements for the tyre & fitment industry:

- Tyre surance
- Industry specific data files – stock files
- Job cards
- Historical vehicle information
- Warranties
- Cross brand view – comparison
- Re-order quantity for each item
- Report writer
- Wide range of pricing promotions

### SingleView Module:

SingleView is a new and enhanced system that enables operators to gain instant access to all customer information from one single screen, as well as process relevant sales documents like quotes, invoices, sales orders and job cards. This module is designed to streamline your sales processes.

#### Benefits:

- Execute all actions from one single screen
- Simplified, easy to use system
- Enhanced efficiency in customer service
- Inter branch view of stock

#### Features:

- Quick Debtor search functionality
- Quick sock search functionality
- Quick historical document search
- Quick item selection functionality
- Quickly preview or print documents
- Item details functionality
- Save and recall documents
- Adjust line items on the fly
- Customisable and sortable grid screen
